

Summary

Senior engineer & technical lead; 8+ years in full-stack development, platform engineering, and customer enablement:

- **Languages:** Python | Java | TypeScript | Go | SQL | C++
- **Platform/Cloud:** Kubernetes | Docker | AWS | Azure | GCP | Ansible | Terraform | GitLab CI/CD | GitHub Actions
- **LLM & Applied AI:** Gemini/Vertex AI | Claude/OpenAI APIs | MCP | RAG Patterns | NLP | Computer Vision | Eval Design
- **Full-Stack & Data:** React | Node.js | PostgreSQL | Redis | REST/gRPC | FastAPI | MLflow | TensorFlow | PyTorch
- **Certifications:** AWS Certified Cloud Practitioner | CompTIA Security+ (SY0-701)

Experience

- **Senior DevOps Engineer**, Game Plan Tech, Reston, VA 05/2026 - Present
Cloud modernization for the Defense Logistics Agency: builds GCP infrastructure, guides teams off on-prem/AWS
 - Drives DLA’s GCP migration with Terraform-managed infrastructure, repeatable deployments, and develops agent-driven code quality, security, and compliance checks
 - Deploys Gemini on Vertex AI via LiteLLM + OpenWebUI, custom RAG, document extraction, and virus scanning tools
- **Senior Engineering Lead**, Clarity Innovations, Columbia, MD 02/2024 - 05/2026
Technical lead & manager for cloud-agnostic CI/CD platform serving 100+ software teams across AWS/Azure/GCP/OCI
 - Leads customer enablement for 100+ engineering teams: weekly technical sessions with 70+ attendees, processing 80-150 issues per 2-week sprint with SLAs, self-service docs and video library adopted across the customer base
 - Architects secure-by-default CI/CD pipelines to enable 1-click deploys to AWS/Azure/GCP/OCI for 60+ multi-env apps; established org’s first auto-scaled runner pattern, immediate upscale without disrupting existing workflows
 - Mentors engineers on DevSecOps best practices; leads technical interchanges
 - 2024 Award for Excellence: leadership, teamwork, and collaboration impact
- **Senior Full-Stack Software Engineer & Tech Lead**, Kessel Run (U.S. Air Force), Boston, MA 06/2020 - 06/2024
Led 12-member eng team on mission-critical software for 10K+ users, replacing a \$1.6B legacy system
 - Designed and shipped an event-streaming platform (Protocol Buffers, RabbitMQ) processing 10-15k events/day across 15 app teams (100 engineers); introduced rehydration for full state recovery for any downstream consumer
 - Drove organization’s first Kubernetes adoption, deployment patterns, and training for 50+ engineers; hand-picked for rapid outage response team, cutting downtime by 72%
- **Developmental Engineering Lead Officer**, U.S. Air Force, Los Angeles, CA 07/2016 - 06/2020
GPS Integrated Circuit and Satellite Communication Systems Engineering Lead
 - Hardware and software engineering lead on GPS integrated circuit and satellite communication programs; led 10-engineer teams, balanced 500+ requirements, and supported \$1.8B in program engineering definition.

Education

- **Master of Science, Computer Science**, Specialization in Machine Learning 05/2019 - 11/2022
Georgia Institute of Technology, Atlanta, GA, GPA: 4.0
- **Bachelor of Science, Computer Engineering** 09/2012 - 05/2016
Boston University, Boston, MA

Additional Information

- **Awards:**
 - 2024 Award for Excellence; Officer/Engineer of the Year: 2022, 2021, 2020, 2019; Academic Excellence: 2013, 2016
 - BU ECE Design Excellence Award (Liquid Rocket Thrust Vectoring Firmware)
- **Projects:**
 - MLOps Model Platform – Production ML serving on self-hosted k3s (FastAPI, MLflow, Prometheus/Grafana, GitHub Actions CI/CD)
 - Home Rental Automation Platform – Production system automating booking-to-check-in for a short-term rental: DocuSign, Seam smart locks, HOA notices, cleaner scheduling (FastAPI, PostgreSQL, Gmail API + OAuth, self-hosted Dokploy)
 - Miasma – Privacy protection platform with web scraping, campaign management, and automated data injection (Python, React, FastAPI, PostgreSQL, Redis, Docker, GitHub Actions)
 - Reddit Translation Bot (Python, Telegram API, Google Translate API) – Cloud-deployed on Heroku
